California OES Weekly Weather Threat Briefing

November 8, 2017
1:00 PM PDT

Day 1: Valley rain, high elevation snow (above pass level) and strong gusty winds through Friday.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

Prepared by: Leslie Waite
801-524-7907

Key Points

11/8 – 11/15

Thursday-Friday

- Light valley rain and moderate mountain precipitation will continue. Leaf-clogged drains could result in ponding of water on roadways and minor street flooding in neighborhoods.
- Snow levels will remain high, above most pass levels, but there could still be impacts to travel as roads will be wet and slippery.
- Winds will be strong and gusty at times, as high as 60 mph over highest elevations. Strong winds could down trees and powerlines with prolonged power outages.

Saturday

- Short break in weather system expected with no new impacts anticipated at this time.

Sunday-Tuesday

- Another round of valley rain and high elevation snow possible.
- This system is expected to be equal to the one currently starting to impact the State.

California OES Impact Threat Matrix

Nov 8 – 15, 2017

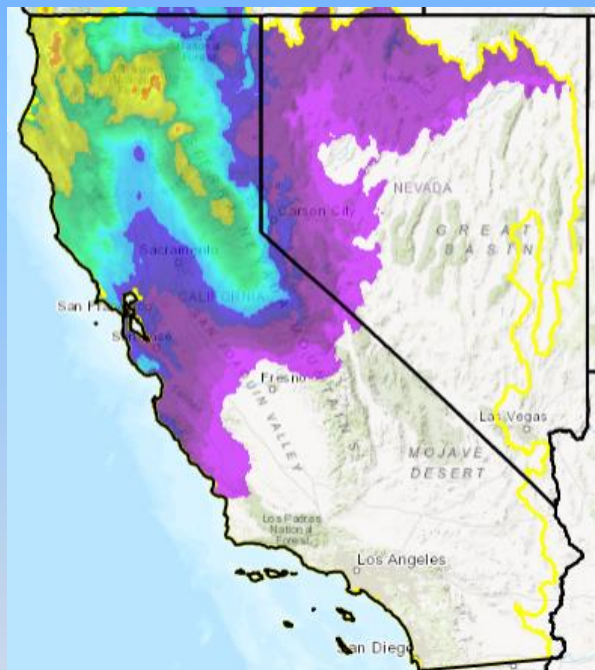

DAY/THREAT	THU	FRI	SAT	SUN	MON	TUE	TUE
Fire Weather
